**Subject:** For Review: 2019 Region 3 Snapshots – Sklaney  
**Attachments:** 2019 Snapshot Review\_Sklaney\_3 sites.docx

Dear Christopher Sklaney-

My name is Nonresponsive based on revised scope I am a contractor supporting the Superfund Redevelopment Initiative (SRI) at EPA Headquarters. SRI maintains online information about sites in new reuse and in continued use. A brief write-up, which we call a “reuse snapshot,” for each site is posted on: <https://www.epa.gov/superfund-redevelopment-initiative/region-3-superfund-sites-reuse>.

We would appreciate your review of the attached document for accuracy and any additional reuse information you might be able to provide. Please feel free to request review or input from other site team members, as appropriate. These “reuse snapshots” are drafted to focus on site reuse and continued use; they are not meant to provide a remedial overview or comprehensive site history. If readers are interested in finding out more about the site remediation, the SEMS profile page will be linked below each reuse snapshot.

Also included in the attached document are reuse indicator tables for each site, indicating the presence of specific reuse types on site. These tables have been drafted per the site uses described in the reuse snapshot text. If you make any changes to reuse information, please make sure the changes are consistently reflected in both the text of the reuse snapshot and the table.

We would appreciate if you would return all comments and review by June 28, 2019. We will check in with reminders if we do not hear from you.

If you have a Superfund site in reuse that we have not captured in the attached document, we would love to hear about it! Please let us know the name of the site and we can work with you to develop a new snapshot and accompanying reuse indicator table.

If you have any questions, please feel free to contact me, and many thanks for your assistance with this effort!

Thanks,

Nonresponsive based on revised scope
